SUPPLEMENTARY INFORMATION:

Background: The Federal Motor Carrier Safety Administration (FMCSA) needs a better understanding of the commercial motor vehicle (CMV) driving population. Driver-related factors are an important consideration in CMV crashes, but there is no central nationwide source of information describing the population of drivers operating CMVs in the United States (US). Estimates of the number of commercial drivers and particular subsets of drivers (e.g., local, short-haul, and long-haul) are needed and would benefit FMCSA in assessing the impacts of proposed rules and the improvement of its safety programs. In particular, information on driver work history, work schedule, and compensation is needed in many different types of analyses conducted by the FMCSA.
